HON. CHAS. STEWART HOLDS BIG MEETINGS IN THE EDSON-JASPER FEDERAL CONSTITUENCY

The Honorable Charles Stewart, the present member for the West Edmonton Riding and the Liberal candidate for the newly-formed Jasper-Edson Constituency, paid Stony Plain a visit on Friday morning. Mr Stewart had held a meeting at Keep Hills on Thursday evening.

After spending Friday morning at Stony Plain, he left for Kapassiwini; and in the evening he held another meeting at Tomahawk. Mr George J. Bryan accompanied him on his trip. Mr Stewart's main object was to meet the electors in some districts that he may not be able to visit at the time of the next election. At his meetings Mr Stewart emphasized the fact that as a producer of raw materials, Canada must sell abroad. To do so she must reduce her tariffs, so that other countries can sell to her; for if they cannot sell they will not buy Canadian goods. Mr Stewart stressed the need of Government control of the price spread between raw materials and manufactured articles, showing that this had increased from 15 per cent to over 40 per cent. The need of a publicly-owned National bank, un-employment insurance, and the control of corporation financing was also stressed by Mr Stewart.

Despite harvesting operations, the meetings were well attended and enthusiastic, and indicated the same trend of feeling which has swept the Liberals into power in all recent elections.

Hon. Charles Stewart.

RUSSIAN WHEAT SITUATION

(Annual Average Wheat Production 680 Million Bushels)
It is estimated that since 1916 the population in Russia has increased by at least 25 million persons, which means that Russia's annual requirements of wheat are at least 125 million bushels per annum more at this time than they were in 1916. Her production of wheat in 1916 is not accurately known, but it can be said with fair accuracy that the average annual production for the past two or three years has been very little, if any, greater than it was before the War in 1913 and 1914. Thus it will be seen that Russia easily requires all the wheat she is now producing for the use of her own people. Russia, therefore, should not be, on the average, a serious competitor in world wheat markets.

THE NEWS OF STONY PLAIN AND DISTRICT.

Monday next, Sept. 3rd, is Labor Day, and a public holiday. All places of business in Stony Plain will be closed.

Rev and Mrs W E Sieber returned Friday from a motor trip to Bashaw, where they had been visiting old friends.

Mrs R E Wood returned on Friday's train from the West.

Mr Ralph Witherspoon left on Monday for Fairview, to resume his duties as teacher there.

Mrs Kowensky left on Saturday for a visit with friends in Vancouver.

Wm Kelly, electrician, Calgary, who had been spending a vacation here with William Kelly, left on Sunday for his home.

Jerry the Busman was back on the job Sunday, after a short holiday.

Mr Michael was in attendance on Monday at the convention in Edmonton of the Delco Light dealers.

Lucknow S D Trustees have appointed Miss Anna Miller as a teacher at their school.

Mr and Mrs Fishenden are holidaying at Vancouver. The night shift at the local station is in charge of Operator Davis of Vegreville.

Mr Louie Miller is spending a vacation with Rev B F and Mrs Behrendt, at Beaver Hills.

Dr Walton is now driving one of those new V-8 Ford Sedans.

Saturday's arrivals included W Rosnau from Bruderheim; and Monday seen Sam Anderson arrive from Jasper.

Mr and Mrs Raymond Shaul were Sunday visitors at the Shaul home at Rosenthal. Raymond expects to teach at the Czar school, and may get a call to a school in Edmonton.

Miss Elsie M Radcliffe is leaving shortly, for a trip to the Coast.

Next Tuesday, the 4th, sees the classes at the two local schools reassemble.

Monday's train from Vancouver was about seven hours late.

Some disappointment was felt by the ball fans on Sunday when the Stony team did not keep their engagement at the Grove.

Starting next Wed., the 5th, the business places in Stony will be open every day in the week until 6 p.m., except on Saturday, when they remain open until 9 p.m.

On Sunday next the regular evening services will be resumed, starting at 7.30.

The official list of Text Books for 1934-5, issued by the Department of Education, can be seen at The Sun Office.

Fiddlers' Contest, One-way, Friday, Aug. 31.

Now It Could Be Done

Probably it is as direct reaction to the appalling state of irritant unrest which keeps international nerves continually on edge that more is being written and heard now of peace and its perpetuation than was heard or written during the great fiasco which terminated in the framing of the Treaty of Versailles.

The Anglo-Saxon world, at least, has come to the conclusion that a treaty inspired by revenge and nurtured by fear is altogether too provocative an instrument to produce anything more than a mere armistice or truce. That section of the world now is convinced that the Christian virtues of humility and fraternity could and would provide a better background for an abiding peace featuring the essential conditions of harmony and mutual co-operation.

It is hard to concede that mankind is devoid of capacity to bring about this condition or state. In fact, when one scans the war efforts of the belligerent nations between 1914 and 1918, one is forced to conclude that only the Will is lacking. Were the efforts made then to destroy life and property, exerted now to preserve life and property, world peace quickly would be achieved. There is no doubt of it.

If doubts be cherished, they would quickly be dissipated by reference to the recently published "War Memoirs" of David Lloyd George. First as Britain's Minister of Munitions then as her premier, Mr. Lloyd George was primarily responsible for organizing the country's human and industrial resources for victory. How far-reaching, how extensive that organization was, is vividly revealed in the pages of his narrative. All essential industries were brought within the compass of his authority. All were made to contribute their full quota to the national effort. That gigantic organization was established for the dual purpose of building up the allied, and of breaking down the enemy, capacity to endure. The achievement shows conclusively what can be done by organization on the grand scale.

Considering the efficacy of war-time organization and effort, surely it is not foolhardy to suggest that, were all the major nations of the world to unite in organizing in the cause of peace, lasting and prosperous peace would ensue. And were the same efforts applied to solving the economic problems of the peoples of the world unquestionably they, too, would yield. It is a strange commentary on civilization and human progress that many sacrifices to win a war should be described as "heroic" and, as such, borne with determination and a grin, while sacrifices to win a peace should be branded as humiliating and intolerable. It is strange, too, that war could be financed with no insuperable difficulty, while finances required in an economic depression to keep innocent people from starvation, present apparently insurmountable obstacles to the governments concerned.

Nicholas Murray Butler, noted American liberal, recently translated the financial cost of the world war into graphic and startling terms. It cost 400 billion dollars. "With that money," he says, "we could have built a \$2,000 house, furnished it with \$1,000 worth of furniture, placed it on five acres of land worth \$100 an acre, and given this home to each and every family in the United States, Canada, Australia, England, Scotland, Wales, Ireland, France, Belgium, Germany and Russia. We could have given to each city of 20,000 inhabitants and over in each country named, a five million dollar library and a ten million dollar university. Out of what was left we could have set aside a sum at five per cent. that would provide a \$1,000 yearly salary for 125,000 teachers, and a like salary for another army of 125,000 nurses."

Four hundred billion dollars was expended in a war which took 30,000,000 lives. Surely, a similar amount expended in a peace, would save a similar number from sufferings attendant upon economic depression.

Recover Sunken Gold

Five Million Dollars Removed From Hold Of Steamer Laurentic

Bullion valued at \$5,000,000 (\$5,000,000), was removed by a private salvage firm from the sunken steamer Laurentic, which went to the bottom with a German torpedo in 1917, the London Mail says.

Admiralty divers salvaged \$5,000,000 between 1918 and 1924 and abandoned the remaining \$1,000,000 because the ship had been smashed and buried in the sand.

Salvage operations on the steamship Laurentic, a 15,000-ton White Star liner which lay in 120 feet of water, are known to be among the most difficult ever attempted.

British navy divers clad in rubber suits made more than 5,000 dives to recover \$5,000,000 worth of bullion. The Laurentic was sunk off the mouth of Lough Swilly in Northern Ireland, in a position exposed to westerly and northwesterly gales.

Mail By Rocket

German Invention May Shoot Letters From Dover To Calais

A postal mail service may be established between Dover, England, and Calais, France. The enterprise would employ the "Zucker" aluminum rocket, a German invention which was exhibited at the International Air Post Exposition in London the first part of May.

It is estimated that by means of the rocket service letters may be shot across the English Channel, a distance of 21 miles, in one minute.

It is reported locally that the invention, after demonstrating the practicability of such a service, intends to approach the British and French governments with a view to arranging for a regular rocket mail service, a British syndicate being formed for the purpose. Under the proposed scheme, Calais would be the receiving and dispatching point for the continent.

Looseness Of the Bowels During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly. Do not experiment with a new and untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 38 years.

Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it.

Put up only by The T. Millburn Co., Ltd., Toronto, Ont.

Fight Auto Invasion

French-Canadians Do Not Want Cars On Mount Royal

The only city in the Dominion which boasts a mountain in its midst is in the middle of a small war about the mountain.

Mount Royal, the rearing landmark from which the metropolis of Canada derives its name, is the focus of contention in an argument as to whether automobiles shall be allowed for the first time in history to scale its summit.

The mountain broke into the headlines when Aid. J. Allan Bray ventured the suggestion motorists be permitted to wind their way upward to its wooded dells and broad expanses of green overlooking the modern city. An immediate storm of protest broke and thousands of citizens voiced their determination to preserve the primitive natural charm of Montreal's namesake for future generations to enjoy.

One of the few fortresses yet remaining against the advance of the automobile age, Mount Royal has continued to share its picturesque quaintness with Bermuda's motorless avenues. To date, only pedestrians, bicyclists and the horse-drawn Victrolas which are heritages of another age in Montreal are to crowd on the mountain—and the French-Canadians, who regard the great rock as part of the rich tradition of their land, declare the honking of the automobile horns will never be allowed to break its spell.

Have Suffered Most

Thousands Of German Professors Seek Work In Foreign Countries

Some 7,500 academic and professional refugees from Nazi Germany are now attempting to crowd on the existence for themselves in foreign countries, the New York Emergency Committee in Aid of Displaced German Scholars reveals. It is declared that "of all classes affected by the National-Socialist revolution in Germany, the academic and the professionals have suffered the most."

A high commission for refugees coming from Germany is co-ordinating the work in various countries. Sixty German scholars have been placed in American institutions of higher learning. More than 1,300 German scholars have been displaced, of whom 600 to 700 have or will shortly emigrate. Between 5,200 to 5,500 professional people have left Germany and 1,500 to 1,800 of the 7,000 German university students forced to quit their studies have sought refuge outside Germany.

Alberta Teachers

Considerable Versatility Is Demanded By School Boards

Some Alberta school boards apparently demand considerable versatility of talents in their school teachers. This was revealed at Edmonton as the hearing of appeals in alleged dismissal of teachers was continued before Judge MacDonald, sitting as a board of reference.

A young woman teaching in the Willingdon district claimed she had been dismissed because she could not play the piano.

Another board, through its chairman, stated that the teacher had been dismissed because she was too high strung and was continually bawling the pupils on the heels.

Wanted His Razor

Portland Man Would Shave With Blade That Almost Killed Wife

You can choose your own title for this one. Here's the story.

A little man entered the police station at Portland, Oregon, and asked for the razor which his wife used to slash her throat in an unsuccessful suicide attempt a few days ago.

"What do you want with the razor?" a police sergeant asked. "I want to shave!" was the cool reply. It was suggested that he buy a new razor.

In her 53 flights across the Atlantic, the Graf Zeppelin has never been more than an hour behind her schedule, and in many cases she has been several hours ahead.

The Alaskan coast, on Disenchantment Bay, rose 47 feet during the 1999 earthquake.

Gigantic Cunard White Star Liner

Some Startling Facts About The New Queen Of The Seas

The name of the new Cunard White Star superliner now known as No. 534 will be divulged 24 hours before the hull slips down the ways at Clydebank, Scotland. Queen Mary, launched by King George V., will attend the new liner. The ship will be at least 1,015 feet long and register 73,000 or more gross tons. She will cross the Atlantic from England and France in four days. The cost of the superliner has been estimated at \$20,000,000. The vessel will have 11 decks, one the first class promenade being 750 feet long, just 35 feet less than the entire length of the Mauretania. She will be five times the length of the original Cunarder, be driven of single-reduction geared, the masthead will be 250 feet. The rudder will weigh 163 tons. The Aquitania is but half this weight. The steel plates range from 8 feet in length to 30 feet, and weigh from 200 to 6,000 pounds.

There will be 2,000 portholes and windows, the panes of glass ranging from 12 inches in diameter to large oval portholes two feet high. The anchor cables, wire hawsers and ropes for the ship will be more than four miles in length. The anchors, of special design, will be the world's largest. There will be 60,000 cubic feet of refrigerating space. The automatic steering gear will be the largest on any ship. The ship will be placed in two separate engine rooms. Four turbo-generators will supply power to the auxiliary machinery. Three others will supply light and power for the hotel services in the ship. Oil fuel will be used. The propellers will each weigh 35 tons and measure 20 feet from tip to tip. There will be 257,000 turbine blades, varying in length from two to 18 inches and greater to the thousandth part of an inch. The Clyde River has been widened and deepened for the ship's passage at a cost of \$400,000. The new superliner is being built in the yards of John Brown & Co. Ltd., Glasgow. The Aquitania was built in 1913 and is the largest ship in the world.

There will be three funnels. The first funnel will be more than 70 feet high; the other two lower. This arrangement will keep the decks and ventilators clear of funnel gases. The hull of the first Cunarder, the Britannia, could be passed through any one of the funnels of the new superliner. The ship will contain 50 miles of plumbing. The electric lighting system is sufficient to service a city of more than 100,000 inhabitants, such as Quebec, Hamilton or Ottawa. Steam will be generated in 27 enormous boilers. The number of tubes in the main and auxiliary condensers will approximate 60,000. The electrical wires used would reach from Halifax to Vancouver and then 400 miles out into the Pacific ocean. The giant's stacks will be thirty feet in diameter, exceeding the Holland Tube, between New York and Jersey City, by six inches. From the keel to the top of the foremost funnel is equal to the height of the 15-story building. The engines of the 534 will generate 200,000 horsepower—enough to tow the battleship across the Atlantic. The make up of the ship will require 35,000 tons of steel. The ship will contain 100,000 pieces of crockery. Ten miles of carpets will be used in covering the ship. The ship will include, including knives, forks, spoons, etc., will total 100,000. The ship's decorations will cost \$2,500,000. Her steadiness will be assured by a million-dollar gyroscopic device weighing 300 tons. This device will keep the ship steady in the roughest sea. The captain's bridge will be 100 feet above the water line. The steamer's ventilators will be large enough to swallow a subway car. The sun deck will contain shady garden lounges, palm trees and swimming pools, giving the ship a tropical aspect to the surroundings during all the seasons. The steamer will be insured for approximately \$7,000,000.

The "lost world" of southern Venezuela is being explored by a scientific expedition.

Commemorate Early Flight

Aeroplanes Kept In Air From Dawn To Dusk At Edmonton

The twenty-fifth anniversary of flying in Canada was effectively commemorated at Edmonton recently when some 15 members of the Edmonton and Northern Alberta Aero Club kept an aeroplane aloft for 15 hours, 15 minutes in "a dawn-to-dusk" flight.

In common with other flying clubs across the Dominion, the flights were carried out, each machine staying in the air for shifts of one hour, to be replaced by another before the first had touched the ground.

Pilot C. North Sawie, hopping off at 5:00 a.m., was the first to commence the flight. Captain Pilot Sven Jensen was the last to land when he brought his machine down at 8:35 p.m. after a black rain cloud and thunder made the sky too black to continue.

Miss Margaret Fane was the only woman pilot to take part in the commemoration of the flight made by "Casey" Baldwin, who hopped off in his crudely-made "Silver Hawk" 25 years ago, August 18, in Nova Scotia.

London's Newest Building

Has Hotel Service And Every Accommodation For Tenants

"Flatlets" is the newly coined name to describe a \$10,000,000 block of flats which is being completed in London. The name is intended to describe flatlets having hotel services. There will be 50 flats, accommodating 1,200 people. As far as possible every daily want of the tenants—food, clothing or service—will be available within the building. A shopping expedition of the flat-dwellers will be merely a trip to the ground floor, and there will be restaurants, dining rooms, barber shops and beauty parlors. A novel feature will be a terrace, 16 feet wide, surrounding the top floor of the building. It resembles a liner promenade deck and will be available for sun-bathing and exercise.

Tests have shown that actors or speakers in a hall should speak louder in cold weather, because the heavy clothing of the audience absorbs more sound.

The total length of the Amazon river from the head waters of the Ucayali is about 3,900 miles.

CAN'T SLIP OR SLIDE FALSE TEETH

Don't use any old kind of remedy to keep false teeth in place—use a reliable, recognized one which dentists prescribe such as Dr. Wenzel's Powder. The largest seller in the world—grips teeth so secure yet comfortable they feel natural. Positively no slipping or clicking—blissful comfort assured all day long. Forms a special comfort cushion to protect and soothe gums. No colored, gummy paste—keeps mouth sanitary—breath pleasant. Inexpensive—all drugists.

For covering shelves, lining drawers, etc. in 16 foot white or colored rolls. All dealers, or write—Appleton & Paper Products, Hamilton, Ontario.

W. N. U. 2061

Facts Go To Prove That The West Is Rapidly Learning Its Lesson Of Diversified Farming

By SENATOR W. A. BUCHANAN
In Canadian Business

Alberta leads Canada in per capita production of commercial hogs. Stated baldly, Alberta last year marketed 1,052,169 hogs through the recognized commercial channels. This constituted 32.6 per cent. of the commercial hogs produced in the Dominion in 1933. With 7.5 per cent. of the population, we produced almost one-third of this important branch of livestock marketings.

It would be well to have this fact about Alberta more generally known throughout Canada, especially to the financial, manufacturing and business interests generally. For so long the people of the West have been called "wheat miners" and "soil robbers" that there is a strong tendency to blame the financial ills of the West on poor farming. We have heard Eastern men, high in the business of financial world, say so often, "If you people out West would grow something besides wheat, a bad crop wouldn't cause such a depression," that we had almost come to believe it ourselves, and to wonder if, after all, we were such bad farmers.

The 1931 census furnished us the figures to prove that, farmer for farmer if not acre for acre, we have nothing to be ashamed of.

The last census figures showed that there are more dairy cattle per farm, more beef cattle per farm, more hogs per farm in Alberta than there are in the banner province of Ontario. Check the Statistical Branch at Ottawa for the proof. Take the figures for commercial hog marketings last year as further evidence.

Alberta in 1933 marketed 1,052,169 hogs, Ontario, with more than three times the population, marketed 1,800,000. Quebec, second largest province in point of population, marketed a mere 65,000 head.

We did our share in beef cattle production in 1933, too. Alberta marketed last year 123,000 head of cattle shipping 10,488 of them to the Old Country to find a market. Our combined cattle and hog marketings provided approximately 200,000-000 pounds of beef and pork for consumption. Alberta's consumption of these two meat commodities is in the neighborhood of 93,750,000 pounds annually. Our surplus, for which we had to find a market outside the province, was more than our home consumption.

At a time when Canadians are being told that they must curtail their production of wheat, which is the West's financial mainstay, this matter of livestock production and livestock markets takes on a double significance. If we take acres out of wheat we must either give them over to coarse grains and pasture for livestock, or let them go back to weeds. And we have millions of acres of virgin land available for cattle and sheep grazing upon which we can expand the livestock industry without taking an acre out of wheat. Alberta has practically tripled hog production between 1921 and 1933 while, at the same time, we have practically doubled our wheat acreage. It is being forecast by livestock officials that we shall soon be leading Canada in hog production, it being pointed out that Ontario has come close to the saturation point in the production of pork. The incidence of higher pork prices during the past year due to the increasing market for Canadian hogs in the British Isles is just the stimulus needed to encourage hog growers to expand their holdings.

What has happened in hog production is happening in production of dairy products in "Alberta." In 1933 the province set a new all-time record in creamery butter production, in the neighborhood of 25,000,000 pounds, and the value of commercial dairy products approximated \$12,750,000 as compared with a total valuation of \$52,000,000 for 1932 crops. Another evidence that we are rapidly learning the lesson of diversified farming.

Dairying and hog production.

W. N. U. 2061

therefore, are rapidly taking up the slack in our agricultural fabric. But, as in the case with wheat, we in the West are producing much more than we consume, and the importance of markets abroad grows more acute. Whether in these days of extreme nationalism throughout the world, the West can go on expanding livestock and dairy production while holding its place as the world's largest producer of fine milling wheat will depend entirely upon what can be done to break down the tangled web of import restrictions which we so greatly curtailed world trade. The West would like to increase livestock production, and Alberta during the depression has shown that it can be done. It only remains for markets abroad to offer opportunity for a further expansion of this phase of the farming industry.

The fact is proven to-day that the West is "mining" its agriculture. It is diversifying according to the best practice, and it is becoming adept at it. No longer can we be accused of being a "one crop" country.

By Ruth Rogers

523

PLENTY OF FREEDOM FOR WEE MAIDS

Characterizes French model for pre-kindergarten and kindergarten age.

This adorable little frock of sprigged dimity shows today, finished its sleeves and waistline with lace binding and gingham ribbon. The edge of the sleeve has a val lace frill, to match the crisp white organdie collar edge.

The full-gathered skirt allows plenty of freedom for romping about. It's also pretty as can be and practical too, carried out in pale blue and white tiny-checked gingham, pink and white candy striped percale, red and white plaid lawn, etc.

Style No. 523 is designed for sizes 2, 4 and 6 years. Size 4 requires 1 1/2 yards of 35-inch material with 1/4 yard of 35-inch contrasting 2 yards of lace, 1 1/2 yards of ribbon.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Cunard White Star Superliner

Massive Propelling Machinery Being Installed Most Powerful Ever Constructed

Rapid progress is being made in the construction of the propelling machinery for the Cunard White Star superliner No. 534, which will be launched at Clydebank at an early date by Her Majesty Queen Mary, attended by the King. When completed, this installation will be the most powerful ever constructed for any liner and the spaces reserved in the ship for turbine, boilers and auxiliary machinery will equal the total length of some large Atlantic liners. The combined length of the four sets of engines, one of which has been completed, is more than 200 feet, while no fewer than five separate rooms will be needed for the 27 enormous boilers, nearly all of which are now ready. The main steam piping leading from these boilers to the engines would cover a straight distance of 2,500 feet. The number of tubes in the massive main and auxiliary condensers will approximate 60,000.

The installation of this propelling machinery calls for the attention of highly specialized mechanics. Every one of the 257,000 turbine blades, varying in length from two to sixteen inches, requires expert testing by hand. The gear wheels, of which there are four, received three months of delicate cutting and are lined up to a thousandth of an inch.

Holes in the stern of the hull are being completed and will soon be ready to receive the propeller shafts. This installation consists of a series of forged steel shafts approximately 33 feet long. When joined together, the shaft complete line of shafting will extend a distance of nearly 230 feet, being actually nearly 20 feet greater in length than the hull of the first Cunard liner, "Britannia".

The greater part of the propelling machinery will be fitted into the ship after the launching. Owing to the size and weight of the various parts it will be necessary for them to be handled in sections.

The four propellers of the No. 534 are the largest ever cast for any ship. Each one will weigh 35 tons and have a spread of nearly 20 feet from tip to tip. The propellers are made of manganese bronze because of its great strength, non-corrosive and gun-metal qualities. They were cast in the foundry which supplied the propellers for the British Battleship Hood.

Snail hunting is a sport in France.

Western Farmers Favor Plan For Planting Tree Belt Across The Dried Out Areas of Prairies

Some Unusual Operations

Nova Scotia, Doctors Have Had Success With Crude Instruments

That story from Chicago about the doctor who saved a child from strangulation with a kitchen knife and a piece of rubber hose, didn't stir up much excitement among Halifax medical men.

They recalled that one of their number had saved a life in just a slightly different way. Without time to get his instruments, he had reached a home where a child lay near death through strangulation.

In the house he found an ordinary jack-knife. While this was being sterilized by boiling he took the father's clay pipe and snapped off the stem close to the bowl. Then he made an incision with the jack-knife, and inserted the pipe stem into the lad's windpipe. Life-giving air flowed into his lungs instantly, and subsequently he made a full recovery.

Just as resourceful was another Halifax doctor who arrived at the bedside of a choking woman with only a scalpel. He picked a hairpin from her head; then he cut a slit in her throat and inserted the hairpin.

So that the pin would keep a breathing space open, the doctor tied a length of string to each prong, then brought the strings around her neck and knotted them firmly at the back of her head; then he cut a slit in the skin and inserted the hairpin. The stricken woman to breathe comfortably until she could be taken to hospital for an operation. She too recovered, and to-day is alive and well.

Girls Take Up Dentistry

Profession Is Attractive To Formosan States Canadian Principal

Formosan girls are attracted more to dentistry than to the other professions, and are making good at it, in the opinion of Miss Dorothy C. Douglas, principal of a school of dentistry in Formosa, who passed through Winnipeg for a furlough at her home in Lucknow, Ontario.

"One girl graduate of our school is an exceptionally good dentist," Miss Douglas added. "She offers a reduction in her set prices to all patients who are Christians."

STARS GLEAM FOR ROYAL EXILES

The stars are growing more favorable for exile royalty in Europe, observers believe. At Bonn, Holland, the 75-year-old wood-chopping Emperor Kaiser Wilhelm II. casts anxious eyes at his former German domain, where the populace has endured political insecurity for most of the post-war years. Not much farther away than a "Big Bertha" shell could travel, waits handsome Prince Otto at a villa near Brussels, Belgium, hoping to hear trumpets sound for the restoration of the ancient house of Hapsburg to its throne in Austria and Hungary.

With the announcement of the start of the tree belt in the United States comes a suggestion from many farmers in the dried out areas of Saskatchewan that federal authorities should take under consideration a tree belt plan for the bald part of the prairies.

In this connection Alan Beaven, of the Canadian Forestry Association tree planting car, who has been working in southern Manitoba, and is now going to northwest Saskatchewan and Alberta has discussed the proposal of tree belt with hundreds of farmers both in Manitoba and Saskatchewan and he reports that the project is one the farmers want, it is feasible it can be done as a relief measure and as to details of inauguration and supervision, these should be left to federal authorities.

There are seven excellent reasons cited by Mr. Beaven for the construction of a tree belt in dried-out Saskatchewan.

These seven reasons are: Cooling effect on damaging winds. Breaking up of atmospheric winds. Conservation of moisture. Formation of surface moisture. Breeding grounds and homes for insectivorous birds. Improved conditions for diversification in farming. Improved living conditions for the people.

Basis for improved conditions, according to Mr. Beaven, lies in the fact that any program should aim not so much to try to change climatic conditions, but to so alter the entire agricultural system to take the greatest advantage of moisture secured, and to break up the disastrous wind sweeps.

Taking periods of time, such as 10 years, moisture and precipitation records and velocity of winds have not changed greatly, but intensive agricultural development has changed their effect on the prairies.

Farming operations, he says, have gone on, until much of the crust has been done away with, the sod turned to the sun, and then the sweeping winds have started soil drifting, or in other words the development of agriculture since prairie settlement has turned the prairies at this time into a potential desert.

As to the cost of the project, Mr. Beaven points out that it would not cost more than outlays for relief on the prairie to date, and that 90 per cent. of the outlay would go direct to the farmer for labor.

Mr. Beaven has observed that certain protected areas around farm homes in dried-out Saskatchewan during the past five years have produced more of necessities and sustenance, than all the rest of the farm—Regina Leader-Post.

To Winter Livestock

Plans Discussed At Calgary To Care For Cattle During Winter

Plans for the feeding of Western cattle during the winter were discussed at Calgary by a committee appointed by the Dominion Agricultural Credit Company and representatives of the Central Alberta Feeders' Association, the Olds and Southern Alberta Co-operative Association.

Two plans were discussed. One plan proposed feeder cattle be purchased outright from the rancher, the credit company advancing the major portion of the money and the farmer the rest. The other called for the advance of 50 per cent. of the steer value by the credit company to assist the farmer in carrying over his stock until next spring.

Figuer Is Greatest Gambler

Who is the world's greatest gambler? We'd say the farmer. He gambles with the weather, with the soil, with grasshoppers, with army worms with bugs and a score of other blagues—a desperate chance. If he wins, as he does occasionally, he comes off with a big stake; if he loses, which he does frequently, he has a chance to try again. Happily he is a good loser, or the world would starve.

WORLD HAPPENINGS BRIEFLY TOLD

Raymond Polcar, former premier of France, who "saved the France" in 1925, recently observed his 74th birthday.

The price of flour in London was reduced one shilling per bag of 280 pounds. The new price is 31 shillings and sixpence including the four shillings provided by the Wheat Quota Act.

Premier Mitchell F. Hepburn, of Ontario, declared his government would welcome introduction of unemployment insurance by the Dominion administration.

Ten United States army bombing planes, comprising the Alaska flight squadron, landed at Bolling field, Washington, recently, completing their 10,000 mile round trip to the north.

Kidnapping, not murder, is the most heinous crime of this era, B. K. Sandwell, editor of the Toronto Saturday Night, declared in a recent address.

The discovery of a vegetable fluid which may supersede the use of blood for purposes of transfusions was made known to the members of the 26th annual convention of the Vegetable Growers' Association of America at Toronto.

Premier Benito Mussolini is not necessarily unfavorable to restoration of a monarchy in Austria or even over a combined Austria-Hungary, he told Archduke Otto von Hapsburg in a secret interview recently in Italy.

"We shall not only oppose a recommendation of a 40-hour week as the means for relieving unemployment, but we are firmly opposed to such a system," was the conclusion of an inquiry by the League of British Industries, in a report on the question.

Amy Johnson Mollison will be the first woman pilot on the regular cross-channel service. She accepted a post as commercial pilot with Imperial Airways, explaining she wanted the maximum practice before she enters the London-to-Australia air routes with her husband next October.

Prospecting for diamonds will be undertaken for the first time in British Columbia's history by Thomas W. Hindmarsh and George Ogden, both of Vancouver, B. C. Leases on two 10-acre pieces on the Nechako river, sought by the two men for this purpose, were approved by the provincial cabinet.

Wheat Exports

Total Exports For Past Twelve Months Show Falling Off

Wheat sent to the United Kingdom in July totalled 8,214,546 bushels of the value of \$6,575,382 compared with 10,372,234 at \$7,861,321 a year ago, the bureau of statistics announced. The total export of wheat to all countries during the past 12 months was 70,000,000 bushels less than in the previous 12 months and to the United Kingdom about 42,000,000 less.

July export of wheat flour to the United Kingdom was 264,595 barrels, valued at \$855,326, compared with 235,044 valued at \$524,972 a year ago. The export to the United Kingdom in the past 12 months was 2,718,114 barrels, valued at \$9,331,958, compared with 2,373,063, valued at \$7,639,050 in the previous 12 months. The export to the United Kingdom is about half of the total export to all countries.

Must Be A Habit

Magistrates Free Man Because Charge Carried In Left Pocket

In which trouser pocket does a man carry his change? The question arose in a recent case in a Rhyll, Wales, court. A man accused of stealing a shaving brush from a drug store said he placed it in his right hand while he put his left hand in his pocket for the money. The drugstore then showed him a dealer brush, which he bought. Near home he found he still had the cheaper brush in his right hand and before he could return it the police came. After his testimony the magistrates placed their hands in their trouser pockets. Their money was in their left-hand pockets, and they freed the man.

W. N. U. 2061

Living In Poverty

But Paul Folret, Famous Dress Designer, Expects To Stage Comeback. Still living in his penthouse apartment in Paris, but dependent for food and clothing upon charity and a 70-cent daily unemployment dole, Paul Folret is dreaming of a comeback in the dressmaking realm he once ruled.

"I spend most of my time with scissors and cloth," said the former king of Paris dressmakers, as he told of his misfortune. "I cut out dresses. Someone will buy one and I will start on the road back to success."

"I haven't given up," he declared firmly, although he has been out of work for 18 months and stands in line with thousands of others to get his card punched and receive his dole.

He does not know how much longer he will be able to keep the penthouse apartment, sole remaining sign of his former great wealth.

Once Folret's establishment in his chateau and his three yachts attracted the aristocracy of the world.

Folks Are Generous

Detective Dressed As Mendicant Collects \$40 In Six Days

A Scotland Yard detective disguised himself as an ex-seller selling matches, when he was in search of a "wanted" man. In this disguise he stood on a prominent London sidewalk for six days and eventually secured his man. He also received nearly \$40 from kind-hearted passers-by. Most of the contributors merely passed him a copper or two without bothering to take his matches.

Authorities of Scotland Yard have ordered the money to be paid into police funds.

Glass domes have been installed on British military aeroplanes to protect machine gunners from wind and increase the accuracy of their firing.

Little Journeys In Science

INSECTICIDES

(By Gordon H. Guest, M.A.)

Insecticides are classified into poison sprays, or stomach poisons, and contact poisons. The former cause death when taken internally, while the latter bring about destruction of life by mere contact. Pyrethrum belongs to the contact class of insecticides. Arsenic compounds are usually found in poison-sprays. Finely divided lead arsenate suspended in water is used extensively and is very effective. Calcium arsenate is much cheaper and more abundant than lead arsenate. It is used to wage war against the bollworm, which is very destructive to the cotton plant. It is also used to destroy the potato beetle. Aeroplanes are employed to drop the calcium arsenate in the form of a fine dust upon the cotton plant.

Oil emulsions, produced by the addition of fish-oil soap to oil, are used to a considerable extent. Nicotine, a complex compound found in tobacco, is rapid and effective in the destruction of insects. Lime-sulphur spray is used against scale insects. This is prepared in concentrated form by boiling together water, sulphur, and slaked lime. Prussic acid is used as a fumigant in greenhouses and on nursery stock. It is an extremely poisonous substance.

Many of the poison gases used in the late war have been tested to discover if they might be used in the warfare against insects. One of these, chlorophenol, is the most promising. Only a few of the more important insecticides have been mentioned. Science is continually developing new destructive agents and more efficient ways of applying them in this everlasting struggle of mankind against insects and fungi.

It's easier for a woman to hold a strong man than her own tongue.

"JACK MINER AND RELIGION"

By REV. W. E. McKILLOP, D.D.

Jack Miner, the Canadian naturalist, lecturer and author, was recently asked to what were his religious beliefs. The bird lover paused for a moment and then quietly replied very emphatically:

"I believe in any religion that is for the betterment and uplift of humanity. I belong to the Methodist Church, which is now part of the United Church. I suppose the principal reason for this is, when I was but 24 years of age, I was married; my wife belonging to that church. As I belonged to no church then, I felt it my duty to go with her. I firmly believe there would be more happy lives and happy homes if husbands and wives attended the same religious services, whether it be Roman Catholic or Protestant.

Well, you say you believe in any

religion, but occasionally on long lecture tours, I am unable to be there. But, I will say this, when I am away, I try to attend some religious service and I receive a blessing by attending it, no matter in what church or service it may be.

The next question asked the famed naturalist was on his opinion of church union:

"That is something I have not thought very much about, except in this way: If we want to do big business financially, we amalgamate our banks. So if we want to do big business for Christianity, why not amalgamate our churches? We don't worship our churches, or at least I hope we don't," said the naturalist. "We worship God. So if we do great things in the Christian world at home and abroad by uniting three

Jack Miner about to liberate a tagged Canada Goose to study their route of migration. One side of the tag has Jack Miner's Post Office address, while on the opposite side of the tag is a verse of scripture, which is Jack Miner's unique way in spreading the Gospel to the Indians and Eskimos of the far north.

religions that are uplifting and for the betterment of humanity, and yet you belong to the United Church."

"I believe," replied Jack Miner, "every man should belong to some church which gives him one central place of worship and which will cause him to take a more active part in Christianity than he would if he drifted from one church to another."

"When you have been away from home every Sunday, I have seen you make your way to various services in different churches, from early Roman Catholic mass to the Jewish Synagogue. Why do you drift around like this?" asked the reporter.

"Well," said Jack Miner, "it's an education and keeps a man from becoming too narrow-minded and broadens his spiritual side of life. I always make it a point to try to be home with my family for Sunday

Christian churches, then I'm in favor of church union." "But," he continued "it always takes time to get things working harmoniously and I am only sorry church union wasn't unanimous for it is so much nearer when all are of one accord and things go smoothly."

Jack Miner himself possesses a unique personality. His sanctuary might be similarly termed. Those who know his home are aware of the two entrances, one through the baseball diamond, which he keeps for the boys of the community, and the other directly in front of his home. A camera path, in which a motto is engraved, runs from each entrance. That through the baseball diamond contains the inspiring quotation: "Rejoice and be ye glad." And that in front of the house, "We thank God for our home."

SUNDAY SCHOOL LESSON

SEPTEMBER 2

Golden text: "He hath showed thee, O man, what is good; and what doth the Lord require of thee, but to do justly, and to love kindness, and to walk humbly with thy God?" Micah 6:8.

Lesson: Micah, chapters 2-4 and 6:1-7.

Devotional reading: James 1:22-27.

Explanations And Comments

A Dramatic Scene: God Presents His Indictment of the Faithless People, verses 1-5. The prophet Micah in a burst of oratorical passion, declares that God will contend, or plead (the figure is that of a complainant in court), with the people before the mountains, as judges. "Hear, O ye mountains, and ye enduring foundations of the earth," the prophet cries; "for Jehovah hath a controversy with his people, and he will contend with Israel." The mountains are spoken of as "enduring," for they have outlived many generations of peoples. Jehovah now speaks. He is the plaintiff; the prophet is his attorney; Israel is the defendant; the mountains are the judges. "O my people," Jehovah exclaims through his attorney, "what have I done unto thee? and wherein hast thou rebelled against me?"—show cause for thy disobedience. No answer comes, for the only answer that could be made is that the fault lies in the people, not in Jehovah.

The Divine Contention of True Religion, verse 5. To all this, verses 6 and 7, Micah replies with what is the greatest saying in the Old Testament, which contains the characteristic messages of Amos, Hosea, and Isaiah. The keynote of Amos' teaching, as we have seen, is justice; that of Hosea, love; and the characteristic note of Isaiah's message as we shall learn is the humble fellowship with God. "He hath showed thee, O man, what is good (good is here synonymous with fellowship to the will of God), and what doth Jehovah require of thee but to do justly, and to love kindness, and to walk humbly with thy God?" With this definition of religion may be compared the last verse of our text from Amos two weeks ago: "Justice, justice thou shalt call down as waters, and righteousness as a mighty stream"; last week's Golden Text: "I desire goodness, not sacrifice; and the knowledge of God more than burnt-offerings"; and verses twelve and thirteen of Deuteronomy 10: "And now, Israel, what doth Jehovah thy God require of thee, but to love Jehovah thy God, to walk in all his ways, and to love him, and to serve Jehovah thy God with all thy heart and with all thy soul, to keep the commandments of Jehovah and his statutes?"

Recipes For This Week

(By Betty Barclay)

ORANGE NUT BISCUITS

(Makes 18 medium sized biscuits)

- 2 cups sifted flour
- 4 teaspoon baking powder
- 1 teaspoon salt
- 1/2 cup sugar
- 1/4 cup shortening
- 1/2 cup finely chopped nuts
- 1 egg

Orange Juice
1 tablespoon orange marmalade.
Sift dry ingredients together. Cut in shortening. Add nuts. Beat egg; pour into measuring cup; add enough orange juice to make 1/2 cup. Combine with dry ingredients and add marmalade. Knead a few seconds on slightly floured board. Cut and bake in hot oven (425 degrees F.) for 10 to 15 minutes.

Note: A little more orange juice will be needed with some flours to make the dough soft.

CARROTS AND PEAS

- 2 cups cubed carrots
- 1 cup cooked peas
- 3 tablespoons butter
- 3 tablespoons flour
- 1/2 teaspoon salt
- 1/4 teaspoon pepper
- 2 teaspoons sugar.
- 1 1/2 cups milk.

Boil the carrots until tender. Combine with the cooked peas, reheat and serve with melted butter or make a sauce of the flour, butter, milk and seasonings, and the cooked carrots and peas, reheat and serve hot.

Office Boy—"I ain't feeling so good; kin I have the afternoon off?"
Boss—"Why don't you tell me your grandmother is dead?"

Office Boy—"I'm saving her for later in the season."

It takes a wise man to give a woman advice without incurring her enmity.

Agricultural Notes

Interesting Items Gleaned From Many Sources

Canada exported 37 live cattle to Hong Kong, China, for dairying purposes during the first three months of 1934.

Hogs graded in Canada during the 32 weeks of 1934 up to August 9, totalled 1,862,717, as against 1,968,651 in the corresponding period of 1933.

The general effect of the customs changes in the Fiji Islands is to increase the margin of preference to imports from Canada and other Empire countries.

There has been more tomato puree, tomato sauce and ketchup, and tomato soup imported into the British Isles from Canada than from any other country during the first six months of 1934.

Reports from Moscow show that there has been considerable difficulty in the Russian production of harvesting machinery, particularly harvester combines, and this has had an effect on harvesting arrangements.

The total stocks of Canadian wheat in Canada on July 31, 1934, were 193,322,863 bushels—18,417,325 bushels less than the total on the corresponding date in 1933, but 61,478,057 bushels more than on July 31, 1932.

Shipments of livestock from Western to Eastern Canada for the 31 weeks of this year, up to August 2, 1933 (figures within brackets) included 48,575 (33,062) cattle; 484 (145) calves; 140,015 (19,375) hogs, and 45,000 (33,945) sheep.

For the first six months of 1934, Canada had exported to the London (England) market the following canned fruits: 71,722 cases of pears; 14,385 cases of loganberries; 2,882 cases of peaches, and 40,964 cases of canned apples.

A trial shipment of Ontario apples in hamper cases in 1933 to Egypt has been well received. It consisted of Ganos, Baldwin, and Ben Davis, mentioned in order of preference. The Ganos in particular, says the Canadian Trade Commissioner in Egypt, should be able to find an outlet in Egypt so as to meet the demand for red apples.

The meat from which soup has been made becomes rather tasteless, but it still contains most of its nourishment. Therefore, it may be used in hash, meat pies and ragouts, where the flavour of vegetables and seasoning compensates for the lack of meat flavour.—Beef, How to Choose and Cook It, Dominion Department of Agriculture Bulletin.

The Japanese wheat crop of this year is estimated at 44,491,150 bushels. It is considered that the annual consumption of wheat about 45,000,000 bushels, so that the five-year plan instituted, two years ago by the Japanese government to grow sufficient wheat for domestic purposes seems to be almost attained in the second year of the attempt.

Latest estimates of wool production for the five principal exporting countries (Australia, New Zealand, South Africa, Argentina, and Uruguay) for the 1933-34 season which has just ended (except in South Africa, where the yield is not decrease, greasy basis, of nearly 200 million pounds, or 9 per cent, in comparison with the 1932-33 season.

Open Cans With Claws

Glacier Park Bears Enjoy Everything But Spinach

Glacier Park bears eat anything that comes in cans—anything except spinach—according to Dr. George R. Rulhe, chief naturalist. Rulhe found a ranger's cabin that had been broken into. Every can had been opened.

"The bears had eaten everything," he said, "except the spinach."

To sceptics who doubted the bears' ability to open tin cans, Rulhe explained:

"They just ram a claw through the tin and draw it around the edge—

as slick a job as any opener will do."

A new radio typewriter has transmitted a weather map with tabulated weather data in 7 1/2 minutes, as compared with about 15 minutes required by the wire machines now in service.

RELIEF COSTS ARE SAID TO BE ON THE DECLINE

Montreal.—The number of people in Canada receiving direct relief at the end of July showed a considerable decline, the total being 990,999, says the Gazette in a special despatch from its Ottawa correspondent.

The despatch continues: This total was divided amongst the nine provinces as follows: Ontario, 300,000; Quebec, 285,000; Saskatchewan, 180,240; British Columbia, 88,100; Manitoba, 56,800; Alberta, 47,350; Nova Scotia, 23,100; New Brunswick, 9,100; Prince Edward Island, 388.

Important decreases in the number on relief were shown by the provinces of British Columbia, Alberta, and Manitoba, while Saskatchewan, due to the desperate conditions created by the prolonged drought, showed an increase. The decline in British Columbia is attributed largely to the industrial recovery enjoyed there both mining and lumbering having notable advances. A slight improvement in general conditions and the absorption of many men by harvesting operations explains the drop in the number of relief recipients in Alberta and Manitoba.

In May, 1932, the total number receiving direct relief aid in British Columbia was 64,262. In March, 1933, it reached the peak figure of 109,949, or nearly 18 per cent. of the total population. Six months later it dropped back to 80,885, but it jumped up to 106,690 in April of the present year. By the end of July it had fallen again to 88,100.

Saskatchewan's figure in May 1932, was 156,735, but for some reason it fell to 40,000 in September of that year, and then jumped to 143,000 in March, 1933. Then came another drop to 40,000 in August of that year. The peak for that province was reached in February this year, the total then being 236,338, or 25 per cent. of the population.

U.S. Builds New Ships.

Twenty-Four Fighting Ships Are On The Program

Washington.—The United States navy department have let contracts for the construction of 24 fighting vessels. Eleven of the ships will be built by private shipbuilding firms and 13 by navy yards. Estimated cost of the ships was not made public.

The ships contracted for will include two 10,000-ton six-inch gun cruisers, two 1,850-ton destroyer leaders, four 1,500-ton destroyers and three submarines of around 1,300 tons each to be constructed by private ship builders. Navy yards will build two 10,000-ton cruisers, with eight and the other with six-inch guns. These yards also will construct four undersea craft and seven light destroyers.

Fisher Body Contest

Western Youths Win \$5,000 Scholarships

Chicago.—Two of the six major scholarships awards for competitions held by the Fisher Body Craftsmen's Guild went to Canadian youths, it was announced at the international convention of the guild.

The major awards are valued at \$5,000 and the Canadian boys winning were J. Ross Farquharson, 20, of Vancouver (1909 Trafalgar street), and Harold Rasmussen, 15, of Regina (2251 Winnipeg street).

Six other scholarships awarded for miniature coaches of superb workmanship to Canadians included: Lawrence Drbert, Edmonton, \$1,000 senior, and Vernon M. Parish, Medicine Hat, Alta., \$500, senior.

Huge Indian Dam Opened Madras, India.—The gigantic Melur dam, which is to fertilize 1,000,000 acres of land, was opened by Governor Sir George Stanley. With a cubic content of 54,000,000 feet the dam embodies the largest single block of masonry in the world, and also contains a "waterfall" of 95 feet over a width of 630 feet.

W. N. U. 2031

Fair Wage Act

B.C. Boys Dismissed When Minimum Wage Law Becomes Effective

Victoria.—Many British Columbia youths aged 20 and 21 and with several years' experience in their work, have received only \$5 or \$6 per week but have now been discharged by their employers because of the province's new mercantile minimum wage of \$12.75 per week for such labor. Hon. George S. Pearson, minister of labor, reported.

The minister publicly requested all youths so discharged to communicate with him and he said he had received reports from more than 60. In turn, he has written to the firms involved and has asked them to reconsider the dismissal, stating that they are big enough to take part in reconstruction of the wage system in the mercantile industry without hurting themselves. "This is a thing which needs co-operative effort," he said.

"We have no desire to prevent any firm from doing business and we want to feel that everybody is working together to raise the wage standard back to a level permitting decent living conditions."

Twenty per cent. of the 80 youths who submitted their cases were with one firm, the minister said.

Ransom Payment Illegal

Claimed It Is Contrary To Law To Pay Kidnap Ransom Money

Toronto.—Payment of kidnap ransom or blackmail demands is illegal in Canada, Attorney-General Arthur W. Roebuck said here. Though the criminal code does not cover payment of ransom specifically, a clause making it an indictable offence to "willfully obstruct, pervert or defeat the course of justice" may apply, he said.

Stating that in the absence of alteration by Canadian legislation the English common law applies in Canada, the attorney-general quoted two English legal authorities to show the payment of moneys in such a case is regarded in England as "aiding and abetting" a crime.

"So long as the people of Canada are prepared to pay blackmail we are not likely to get rid of the racketeer," he added.

Selling Wheat Holdings

Statistics Show Amount Held In Storage Is Dropping

Ottawa.—Canada is selling its big wheat holdings, it is shown by the Dominion bureau of statistics. In the week ending August 17, internal wheat holdings dropped from 157,231,597 bushels to 155,123,697, a reduction of 2,107,900. At the same time Canadian wheat in American elevators amounted to 10,386,124 bushels, compared to 5,262,942 last year.

United States wheat in Canada was placed at the negligible figure of two bushels, compared with 3,700,660 bushels last year.

In transit, wheat on the lakes amounted to 3,691,531 bushels, compared with 4,098,415 for the previous week and 3,239,439 bushels for the corresponding week in 1933.

Road To Jasper

Work On Edmonton To Jasper Highway To Be Started Soon

Edmonton.—Completion of graveling the Edmonton-Jasper highway by the provincial government will start at an early date and operations will commence on the stretches of the road immediately east of Jasper national park boundaries and west of Edson, Hon. J. J. MacLellan, minister of public works, reported on his return from an inspection trip over the highway. When completed this will give an all-weather road between Edmonton and Jasper. Work is being undertaken following an announcement of a federal loan of \$125,000 for the purpose.

Alert Police Force

Winnipeg.—The "best prevention against the kidnapper is an alert police force with a good record for detection of crime," said Sidney E. Smith, president of the University of Manitoba and nationally known legal authority, discussing methods of combating kidnapping.

KIDNAPPERS INVADE CANADA

John S. Labatt, president of the Labatt Brewing Company of London, Ont., who was "matched" by kidnappers between Seattle and London and was held for \$150,000 ransom.

Work For The Empire

Co-operation Would Lead The World To Peace And Stability

Vancouver.—A British commonwealth, solving its own problems through cooperation and leading the world to peace and economic stability, was pictured at Vancouver Canadian Club luncheon in an address by Baron Thomas James Chesbire Tomlin, member of the privy council.

"It is too much to hope that this spirit of helpfulness and co-operation will spring up in the empire and flourish as a flower in a field of stubble," he said. "Through it we may attain the highest measure of common good and teach the world our problem. Let us make our future as glorious as our past."

Lord Tomlin thought the world was suffering from chronic indigestion from over-production and too hasty consumption of new inventions. He reminded his audience he knew something about inventions for he had been chairman of the royal commission on awards to inventors.

Lord Tomlin paid a tribute to the United Empire Loyalists and expressed the hope that their spirit of co-operation would live in Canada to assist the Dominion in working out its problems.

Regulate Hay Exports

Shortage Of Hay And Straw In West May Make This Necessary

Ottawa.—Because of the shortage of hay and straw in many parts of Canada, particularly the West, the government will take steps to regulate exports by license, it was learned here unofficially.

The situation in the prairie provinces, and in the Maritimes to a lesser extent, is pressing, according to representations to the government. Regulation of these exports by licensing would be to protect the farmers from speculators.

Burnt-out areas in the United States are badly in need of hay and that country contemplates taking off the \$5 a ton duty for the entry of Canadian hay.

CANADIAN WINS MARATHON FROM EMPIRE'S BEST

H. Webster, of Hamilton, Ont., winner of the Men's Marathon at the British Empire Games, entering the Stadium at the White City, London, for the last part of the long grind. D. McN. Robertson of Scotland finished second.

Want Regulations Altered

Cattle Shippers Cannot Afford Stoppage At Hudson Bay Junction

Prince Albert.—Immediate alteration in regulations that at present interrupt the direct shipment of cattle to Churchill was urged here by leading livestock producers of Saskatchewan and Alberta.

W. E. Cutt, manager, of the Saskatchewan Livestock Pool, and Jack Ryers, manager of Western Stock Growers, Calgary, were emphatic in declaring Churchill would suffer unless arrangements which force a stop-over at Hudson Bay Junction for feeding are changed.

"Shippers cannot afford to stop over on a run of only 760 miles," Mr. Cutt stated. Direct runs of 40 hours were not uncommon in the overland journey from Calgary to Montreal, he said, and travelling time to the northern port was only 38 hours, including a stop of more than an hour at Melfort.

They were enthusiastic over the potentialities of the port should regulations be changed, and declared treatment at the hands of officials was also of the best.

Post Office Efficiency

Letter With Only Street Name Delivered Safely

Calgary.—"Third Avenue, West, Canada," was the address placed on a letter mailed in London, England, some time ago and it has reached its correct destination. The envelope also bore the name of the addressee.

It landed from the Old Country at Montreal where postal officials were puzzled but, marked "Try Verdun," Verdun, Lacine and Ville Ste-Pierre successively reported the letter was not for them so it was sent on to Ottawa.

A postal official at Ottawa knew of the numerical system of street naming in Calgary and so the mislabeled was sent here where the name and address "clicked."

Canada And Naval Defence

Should Defend Pacific Coast With Own Navy

Montreal.—"Canada should defend the Pacific coast with her own navy and let the British navy police the Atlantic," according to the suggestion of Sir Reginald Yorkie Tyrwhitt, admiral of the British fleet, who sailed aboard the liner Montcalm.

"Perhaps we cannot expect you to protect both coasts," said the admiral, "but you might protect one with your own navy. You could leave the Atlantic coast for us to look after, while perhaps you could look after the Pacific yourselves."

Attempts To Burn Elevator

Yorlton, Sask.—Royal Canadian Mounted Police are investigating attempts made to burn the Northern and Wheat Pool elevators at Saltcoats. Waste soaked in coal oil was found in the compressor room under the gang way in both elevators. This had been ignited but lack of air forced the fire out. Flanks above the deposit of waste had been scorched.

MAY PUT BAN ON PUBLICATION OF WHEAT REPORT

London.—Chances of publication of the 1,500-word document dealing with the world wheat problem, which will be submitted to the 21 interested governments, appeared slim on the eve of the final session of the international wheat conference.

While a high authority said the conference will be urged to publish the document, an overwhelming opposition to the proposal was uncovered by a canvass of the various delegates.

Argentine and Russian delegates strongly favor revealing the contents of the closely guarded document, but Canada, United States and Australian delegations are opposed, and most of the Europeans present favor the latter group.

Knowledge that influential interests in England, the United States and other countries, which bitterly oppose further government control, would bring strong pressure to bear if the present proposals were published was given as the chief reason for secrecy. Conference sessions here have been behind closed doors.

The document which will go to the governments, it was learned, however, contains proposals for a flexible quarterly export quota agreement as well as for continuation of the annual quota method used during the crop year ended July 31, 1934.

The quotas would be allotted from an estimated world demand of 600,000,000 bushels, but upward of 60,000,000 would be held "in reserve" for distribution during the year if changed conditions warrant such action.

It was understood, too, the document contains proposals for continued reduction in acreage and for extension of the world wheat pact beyond its expiration date, Aug. 1, 1935.

Years Of Isolation

Russian Colonists Were Ice-Bound For Five Years

Moscow.—Forty-four Russian colonists, ice-bound for five years on lonely Wrangel island in northern Siberian waters, were reached by a group of Soviet scientists on the ice-breaker Krasin, according to word reaching here.

Their lonely years of isolation were supposed to have ended last year, when the Chukotka sailed for Wrangel island. But that expedition sank, while its 102 passengers were rescued by aeroplane after months on an ice floe north of the Behring Straits.

Wireless messages reaching here described the uncontrollable enthusiasm with which the colonists greeted the relief party.

Precious Metal Salvaged

Silver From Sunken Steamer Egypt Taken To England

London.—Carrying gold and silver bars worth nearly \$1,000,000, the Italian salvage vessel Artiglio tied up in Plymouth.

The precious metal is part of the cargo of the steamer Egypt, sunk off Ushant 14 years ago while carrying \$5,000,000 in bullion. Four millions were recovered during the past two years, but this year the work was much more difficult, as the vessel had settled deep into the ocean bed.

The cargo brought in by the Artiglio was obtained after two months of hard work.

Returned For Revision

Plans For Proposed Bridge At Vancouver Sent Back

Ottawa.—Plans for the proposed first narrow bridge at the entrance of Vancouver harbor have been sent back to the designers with a request the location of certain piers be changed so as to provide for a larger main span. This action was taken after a sub-committee of the cabinet listened to views of opposing interests in the matter of the width and height of the main span of the proposed bridge.

"J. E." to Live in Edmonton

J E Brownlee, M.L.A. premier of Alberta, intends to continue to make his home in Edmonton. Whether he will engage in law practice is not known as yet, says the Journal. Mr Brownlee is visiting this week, at his old home town, Bridgen, Ontario. He is accompanied by his wife and two sons, John and Alan. The party plans to leave by motor car Monday, the 3rd, heading for Edmonton, and are billed to reach there in a week. The two boys attend a City school.

Stony Plain and District

Miss Edith Oatway entered Royal Alexandra hospital on Tuesday, to begin training as a nurse.

Mr Robertson returned this week from his vacation, and resumed his duties at the local bank.

S. P. Walther League ball players have a game advertised for Sunday Aft. Sept. 2d, on the local diamond, with the Brightbank bunch.

The demand for farm laborers has increased since last week—more job-seekers passing thru the farms than formerly.

The extra gang of railway navvies which had been here for several weeks, taking the "heaves" out of the main-line track, was moved out, yesterday morning.

Spruce Grove News.

Mr and Mrs Callahan left Monday on a motor trip to Killam.

Altho the ball team invited to play here on Sunday last did not show up, a pick-up team was rustled, and a game was had.

The Grove is a quiet place this week—"Our Own Tuffie" has departed for the harvest fields.

Mr Alvin Miller returned to his home in the Grove district last week, from a very remunerative trip to the gold-washing districts of northern B. C., he having been located on Smoky River. Besides a sum he cleaned up in a short time amounting to about \$500 he brought back as a souvenir a stone from the fireplace where Aleck Mackenzie the Adventurer camped in the year 1793. Alvin returned, to prepare for a much longer stay in the Smoky district, in search of gold.

CHEVROLET CANADA'S GREAT SALES LEADER!

Try its
KNEE-ACTION RIDE
Today

HAVE you noticed how all Canada has taken to Chevrolet—and to Chevrolet's famous Knee-Action Ride?

Again in 1934—just the same as it was in 1933 and '32—public demand for Chevrolet cars has sent production to the highest total obtained by any manufacturer!

And if there is one single feature which more than any other has contributed to this great leadership, it is Chevrolet's bump-conquering, bounce-abolishing Knee-Action Ride! No other ride in any low-priced car

can compare with it for comfort, safety or stability! Owners themselves have proved that in millions of miles of driving.

Why not try the ride-sensation of 1934 today? We'll gladly provide a Chevrolet for you to drive yourself.

Here's a PAINTING BOOK FREE for the asking!

● And a chance to WIN one of the many fine prizes!

You are going to love the Painting Book prepared for you by the makers of **KEEN'S MUSTARD**...pages of dandy pictures that you can colour with your own paints or crayons!

Tell Mother you are going to the store to get a KEEN'S GIFT BOOK!

Get your copy right away, for your dealer has only a limited number for free distribution, and we don't want YOU to miss out on this gift. You, too, will say "It's as KEEN as Mustard!" And maybe you will win a fine prize—in money, a bicycle, roller skates or a play money bag, baseball, bats or dolls or doll's clothes, etc. Wouldn't that be grand?

Remember, you don't have to buy anything to get this book, though when you tell Mother she will probably want you to bring a tin of **KEEN'S MUSTARD** back with you. So get busy. Ask for your book today. Start painting and show folks what a swell artist you are.

If you cannot get the book from your dealer, write us for it, enclosing 25 stamps to cover cost of mailing and packing. Send 1000 Amhurst St., Montreal, P.Q.

KEEN'S

D.S.F. Mustard

OCCASIONAL WIFE

By

EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor, trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Other in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but he refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter finishes his exhibit and asks Avis for Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Avis insinuates that Peter adopts the latter title and Camilla, heart sick, goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered by the disaster, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope". Camilla's advertising campaign and Tiny Tots broadcast was a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who had been so stimulating business for his company.

Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France. After the ship's departure from New York, he is on his way to his cabin when he meets Avis Werth.

(Now Go On With The Story)

"Blue" Spells

Reduce some women to the penitent shadow of their own smiling selves. Others take the Vegetable Compound when they feel the "blues" coming on. It steadies quivering nerves, helps to tone up the general health—gives them more pep... more charm.

CHAPTER LVIII.

It was in such a mood, when Peter had been exceptionally gentle and solicitous during the evening, that Avis ventured upon a long-dropped subject while they smoked and talked in a secluded corner of the deck together. He had not mentioned Camilla's name in her presence that day and she related the remark after referring to Camilla first in a casual manner.

"Poor little impulsive thing! I suppose it accounts for her genius. A girl like that never should fall in love. Her emotions are too violent, and jealousy is always her fatal undoing—like her breaking your statue. I'm sure you forgive her for that, after what happened."

He turned quickly to face her. "Why, Camilla never did that!"

"Oh—," she caught her breath softly, "then she didn't tell you, after all!"

"Tell me what?" sharply.

"Why—! All about it. She came to me the next day and begged me to help her some way to make it up to you. I suppose she had told you, but the way you won the exhibit, and—"

"You don't mean—that she deliberately destroyed it, and then—?" desperately.

Avis gestured hopelessly. "She wasn't really wholly to blame. Just a little red or green, whatever jealousy makes you see, and did it in a sudden fit of revenge—then instantly regretted it." Her voice was smooth, soft, convincingly sympathetic.

Peter was silent for awhile. Finally, he asked in a follow voice, "But what did she come to you about?"

"Told me that she had persuaded you to enter the other group in the exhibit and begged me to try to influence Uncle John and the committee in your favor."

He sat forward suddenly with a groan. "Is that—why I—?"

She shook her head with a slow smile. "On my honor—no, Peter. I went to see him, but his vote already was cast for you and I hadn't a thing to do with it. As for his influencing the committee, I knew that was impossible and never suggested such a thing. It would have hurt his pride to allow him to think that I would venture to persuade him. Fortunately, it turned out all right for you. It was obvious that Uncle John was not the only one who voted for your piece, but it happened that his vote was the deciding factor. You won by a single vote."

He smoked in silence again, and she was wise enough not to intrude upon his thoughts. His bewildered thoughts which he knew were struggling within him. After awhile, she reached over and touched his hand lightly.

"I'm sorry, I shouldn't have mentioned it, but I have felt so sorry for Camilla all this time and I think

about it often. She must be very madly in love with you to have done a thing like that."

"Mad enough," he exclaimed with vehement emphasis, "but that can't be love! How could anyone be cruel to the one you loved?"

She hesitated then. "I'm sure I couldn't, but there are all kinds of love, you know. Camilla is so emotional that she expresses everything she feels in action. But there is also deep, quiet, steadfast love."

"How do you know so much about it?" he asked colorfully.

She drew a quick breath, sighed. "Ah, that is another story—that I couldn't tell you, Peter."

"You have been—hurt, too?" gently.

"Not—by love. But what is one to do when there is no love with which to be hurt?"

He hesitated a moment. "Then you are in love with some man who doesn't—reciprocate?"

She nodded silently her head resting against the back of the chair and her half-open eyes watching him covertly.

"I say he was all kinds of a sap not to wake up and find himself," Peter declared forcefully, then sighed deeply. "Gosh, this love business is a wild, untamed thing, anyway. Why do people select their life partners by impulse and emotion instead of by practical reasoning as we venture into any other kind of business?"

"Because there is no getting away from love, I guess," pensively.

"Well, what is it, then? How do we recognize it when we do find it? Why isn't it complete for us?"

"Why, Peter, you talk as if you never had been in love!"

"Why?" tersely.

"Because you would know the answers to all those questions."

Silence. Then "Well, I don't." He could not escape from that stinging sensation which Avis' revelation about Camilla had given him. The thought that she, his precious Camilla, would so betray and humiliate him at the very climax of his ambitious efforts toward himself, the closing efforts toward him, the closing of a garrote around his neck. He might have doubted her guilt, had Avis not told him so simply and as if unaware that she was betraying the other's confidence in her. No, it was true enough; but the thing he brooded the thing in his mind, the more confused and hurt and angry he became.

He brooded in silence for awhile, into which Avis did not intrude. Finally, he arose impatiently as if the inertia of sitting quietly was no longer to be endured. "Should you like to go in?" he asked tensely.

"I'm not much of a companion this evening. This thing has got me—"

about Camilla. I hope you understand that I'm not—"

"Of course," she interrupted kindly. "I'm only so sorry that I mentioned it, Peter."

"I'm glad—mighty glad to know it," he contradicted. "More than anything else, I hate deceit. It helps a lot to know just how things stand."

"Well, don't you do anything rash while jumping overboard."

"Not on your life. I think I have discovered one more thing tonight—that love isn't worth all the suffering we take with it."

"Oh, Peter, you don't be cynical." Avis pleaded.

"I'm not. Only being sensible."

She laughed softly. "You are much too romantic to renounce love. Get a hold of yourself! Please! Good night, Peter."

He smiled down at her with a new tenderness. "Good night, little girl. She carried away with her."

She carried away with her the thought that she had been so deceived.

She carried away with her the thought that she had been so deceived.

BUT MADE IN CANADA GOOD

Little Helps For This Week

"Study to show thyself approved unto God, a workman that needeth not to be ashamed." 2 Timothy 2:15. "And let us not be weary in well-doing; for in due season we shall reap if we faint not." Galatians 6:9.

The task Thy wisdom has assigned, Oh, let me cheerfully fulfill; In all my works Thy presence find, And prove Thine acceptable will. —C. Wesley.

What is my next duty? What is the thing that lies nearest to me? That belongs to your every-day history. No one can answer that question but yourself. Your next duty is to determine just what your next duty is. There may be something you neglect, or something you know you ought to do. You would know your duty if you thought in earnest about it and were not ambitious of great things. If it is something commonplace that will make life dreary it will soon lead you to something more. Your duty will commence to comfort you at once, and will at length open the unknown fountain of life in your heart.—G. MacDonald.

The coldest inhabited spot on earth is Verkhovansk, Siberia.

AUSTRALIAN WHEAT SITUATION

(Average Annual Wheat Production 180 Million Bushels)

Australia produces three important crops—Wheat, Mutton and Wool. Since the depression started much acreage formerly in grasses and native pasture devoted to the production of mutton and wool was turned to wheat-raising for the reason that the prices of mutton and wool fell relatively lower than the prices of wheat. Australia refused to withhold either her mutton or wool from the market. She pressed these products for sale at any price. In consequence she has today no surplus of wool, and so this last year the price of wool has made a remarkable recovery. This will certainly tend to induce Australian farmers to take some acreage out of wheat and to devote it once again to the more profitable business of sheep raising.

"Flannel Dance," Sept. 14.

The Lawn Tennis Club have invitations out for a Flannel Dance to be held here the evening of Friday, Sept. 14th. Barth's Orchestra will play, and every one is assured of a very enjoyable time. Lunch will be served.

"The Chaistian Life in Song."

St. Matthew's Church was comfortably filled on Sunday afternoon last, when the noted Lyric Quartet, from Concordia College, Edmonton, gave a concert of hymns and sacred songs. Quite a number of the oldtime tunes were rendered in a very pleasing manner, and these were appreciated by the audience. The Quartet have been asked to give a concert here, in town, at the St. Matthew Schoolhouse.

Prizes for Fiddling.

A contest for oldtime fiddlers is to be staged up at Onoway tomorrow night, the 31st. The competition is in connection with the dance to oldtime music which is being held there that evening. The affair is under the auspices of the Community League, and no doubt but that there will be a good attendance of those couples who enjoy these oldtime reunions. Good prizes will be given the winners of the fiddlers' events. The admission price is low, and a lunch will be served.

"Storm at Daybreak."

Two artists of the screen, new to Stony Plain movie fans, will be seen here on Thursday evening, August 30. These are Kay Francis and Nils Asther. These will be seen in that successful screen picture "Storm at Daybreak," what is said to be a new kind of screen romance. Walter Huston and Phillips Holmes also take part in the picture.

Last Thursday's picture, "The Secret of Madame Blanche," was well patronized, the auditors taking a keen interest in the various incidents portrayed on the screen at the star of the picture, Irene Dunne. The introductory film was "High Hats and Low Brows," a riot of laughter and fun, which was greatly appreciated by those present.

Huallen Items.

(Grand Prairie Tribune)

Henry Ries has returned from a visit to Stony Plain. He was accompanied by Miss Laura Gitzel, who is visiting her parents; also the Misses Emma and Betty Heichel, who had been visiting friends at Golden Spike; and Mr. Louis Ulmer.

Rev. Mr. Unterschuetz of Hythe assisted last Sunday at St. John's Lutheran church services.

Benefits of Co-operation.

Instead of the hay speculators getting in on the soft spots on the hay market, it has been found, that in some districts growers are refusing to sign up. The Creston (B.C.) district which usually has about 300 cars of hay to dispose of, has withdrawn from the market until the alfalfa growers find out more about the market.

Great "Next Year" Country

Athabasca Echo: Gardens had just reached their prime, but are a sorry sight this morning, following the heavy frost. Ah, well, we have a good crop of potatoes safe so far, and next year, Mr. Yes, sir, this is a great next year country.

Given Suspended Sentence.

H. W. Workes of Duffield appeared before Magistrate J. W. McCulla on Saturday on three charges of theft. The accused was found guilty on the first charge, and was given suspended sentence. The other two charges were withdrawn. Geo. J. Bryan appeared for the accused.

Change in Train Service.

Effective Tuesday next, Sept. 4, announcement is made of a change in train service between Edmonton and Jasper by Canadian National Ry. Train No. 189 will pass thru Stony Plain on Sun. Tues. Thurs. at 10:37, instead of Tues. Thurs. Sat. as at present. This train will arrive at Jasper next morning at 8:30. Trains 5 and 6 between Jasper and Prince Rupert will be withdrawn.

The change also affects train No. 195 between Jasper and Pr. Rupert. Effective Sept. 5 the train will leave Jasper for Pr. Rupert and intermediate points at 1:25 p.m. Mon. Wed. Friday.

Passengers from Edmonton for points between Pr. Rupert and Jasper will leave on train No. 1 at 7 a.m. Mon. Wed. Friday, connecting at Jasper with train No. 195.

Sauder Writes a Sermonette.

Rev. G. A. Sauder, a former pastor at the local United Church, has been attending the School of Religion in Edmonton the past month. On Saturday he had the honor of writing the weekly sermonette for Edmonton Journal readers. The Rev. gentleman is at present chairman of Stettler Presbytery of the United Church, while stationed at Naco.

Duffield Doings.

Mr. Andy Brass was one of the chauffeurs who accompanied the Indians from the Wabamun Reserve to the big pow-wow at Banff, and reports having had a very thrilling experience.

The Duffield Athletic Club will hold a meeting tonight, to discuss the matter of paying bills incurred at the time their Sports Day was held last June. The Chairman of the Printing and Advertising committee is expected to attend.
